**Abstract of CN1438789**

The method for switching accessing points (AP) includes following steps. (1) At the same time of keeping the link with the current AP, the user tests the AP signal intensity and quality to determine whether the which AP to switch to. (2) The user carries out the connection with the selected AP. (3) The ID of the user is reported to the wireless gateway. (4) The gateway looks up the user list. (5) Based on the AP address of the switching in user, the switching notice is sent to the original AP. (6) With the notice being received, the original AP sends the user's information to the new AP. (7) the gateway informs the new AP that the user is a switching in user and sends the relevant information to the new AP. (8) with the user being switched in, the new AP sends the acknowledge information to the gateway.
